## Technical Skills

- **Programming Languages: Core Java, Python, C, Php.**
- **Web Development: HTML, CSS, JavaScript.**
- **Database Management: SQL.**

## Projects

### 1. Online Car Rental

**Description**:The Online Car Rental System is a web-based platform that allows customers to rent vehicles online. This system provides a user-friendly interface for customers to browse available cars, view pricing, check availability, make reservations, and process payments. It also includes an admin panel for managing car listings, rental bookings, user accounts, and generating reports.

The project aims to automate the car rental process, improve customer experience, and optimize fleet management for rental companies.
